

# Clouds

Cirrus-  
Thin & wispy

Cumulus –  
"puffy"  
"cotton-like"  
"fluffy"

## Stratus clouds

are uniform  
grayish clouds  
that often cover  
the entire sky.

Stratus clouds tend  
to be featureless,  
low altitude clouds  
that cover the sky  
in a blanket of  
white or grey.

# Cumulonimbus clouds

are thunderstorm clouds. High winds can flatten the top of the cloud into an anvil-like shape.

Cumulonimbus clouds are associated with heavy rain, snow, hail, lightning and even tornadoes. The anvil usually points in the direction the storm is moving. <http://www.weatherwizkids.com/weather-clouds.htm>
